How to Access a Care Coordination Note in Epic

Diabetes Best Practices
1. Follow the Primary Care Diabetes Management Algorithm

2. Ensure patients have a follow-up appointment in 4 - 6 weeks and 3 months for A1Cs >8 to assess response to med/diet/exercise plans

3. Enroll all eligible Diabetes patients in Digital Medicine Diabetes program
   1. If patient has consistently elevated blood glucose, a Digital Medicine pharmacist will contact the patient to alter their medication and discuss alternative options

4. Bulk order referrals for moderate to high-risk diabetes patients to Diabetes Education

5. Diabetes Quarterly Bulk outreaches include:
   1. A1c testing
   2. Lipid panel
   3. Urine Microalbumin
   4. Eye exam
